

## Online cancer education for primary care

### What is GatewayC?

GatewayC aims to improve cancer outcomes by facilitating earlier and faster diagnosis and improving patient experience through:

- Improved knowledge of symptoms.
- Increased confidence in when and when not to refer a patient.
- Improved quality of suspected referrals, reducing delays in the system.
- Improved communication to enhance the patient experience and support patients at each stage of their cancer journey.

Online  
CPD

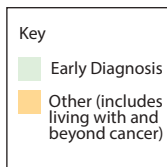

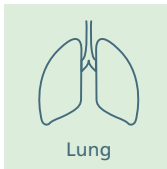

Interactive video  
consultations

Bitesize, flexible  
learning

Interviews with  
specialists

- Acute Oncology
- Brain - Early Diagnosis
- Lymphoma - Early Diagnosis
- Myeloma - Early Diagnosis
- Prostate - Early Diagnosis
- Leukaemia - Early Diagnosis

More courses to be announced shortly.

"I have spoken to a number of my GP partners... and they all agree that this has been one of the most useful educational experiences they have had, and there is evidence that the learning has ALREADY begun to change practice."

Dr Hosie  
GP, Dicconson Group

"I know of the many projects currently ongoing, but none more important than GatewayC. Why? Because, until such time that we have found a cure for cancer, let us make sure our GPs are armed with every tool necessary to detect signs of cancer early."

Saeed Shakibai  
Patient

85%

of GPs felt more confident in knowing when to refer

94%

of GPs reported GatewayC helped with future referrals

85%

reported improved recognition of symptoms which merited a suspected cancer referral
